

12th APRIL/2024

REGIONAL MARITIME UNIVERSITY

ICT DEPARTMENT
BME27B/BMT27B/BNS27B/BEE27B/BCE27B/BCS27B/BIT27B/DIT25
MID SEMESTER EXAMINATION
BCME 101 COMPUTER STUDIES 1

INSTRUCTIONS:

TIME ALLOWED: 40 MINUTES

ANSWER ALL QUESTIONS IN SECTION A AND ONLY TWO QUESTIONS IN SECTION B

INDEX NUMBER: BME0003527

SECTION A

QUESTION 1

Multiple Choice Questions 1 to 60

[1 mark each]

1. Which is the largest computer?
 - A. Mainframe Computer
 - B. Mini Computers
 - C. Micro Computers
 - D. Super Computers
2. Which of the following are the best units of data on an external storage device?
 - A. Bits
 - B. Bytes
 - C. Hertz
 - D. Clock cycles
3. The personal computer industry was started by
 - A. IBM
 - B. Apple
 - C. Compaq
 - D. HCL
4. What is meant by a dedicated computer?
 - A. Which is used by one person only
 - B. Which is assigned one and only one task
 - C. Which uses one kind of software
 - D. Which is meant for application software
5. What was the main disadvantage of vacuum tubes?
 - A. They were larger in size
 - B. They consumed a lot of electricity
 - C. They produced heat and often burned out
 - D. The operation cost was high
6. An approach that permits the computer to work on several programs instead of one is
 - A. On-line thesaurus
 - B. Multiprogramming
 - C. Over lapped processing
 - D. Outline processor
7. The notable features like keyboards, monitors, GUI were developed in
 - A. First generation
 - B. Second generation
 - C. Third generation
 - D. Fourth generation
8. UNIVAC is
 - A. Universal Automatic Computer
 - B. Universal Array Computer
 - C. Unique Automatic Computer
 - D. Unvalued Automatic Computer

9. Which is the highest form?
- Data
 - Information
 - Knowledge
 - All of above
10. What is an interpreter?
- An interpreter does the conversion line by line as the program is run
 - An interpreter is the representation of the system being designed
 - An interpreter is a general purpose language providing very efficient execution
 - None of the above
11. The earliest calculating devices are
- Abacus
 - Clock
 - Difference Engine
 - None of these
12. The full form of ALU is
- Arithmetic Logic Unit
 - Array Logic Unit
 - Application Logic Unit
 - None of above
13. What produces useful information out of data?
- Computer
 - Processing
 - Programming
 - none of above
14. Which number system is usually followed in a typical 32-bit computer?
- Binary
 - Decimal
 - Hexadecimal
 - Octal
15. A computer has very low failure rate because it uses electronic components. It produces very consistent results. This is highlighted by which of the feature of computer?
- Accuracy
 - Reliability
 - Versatility
 - Automatic
16. A paper printout of a document
- Softcopy output
 - Hardcopy output
 - Permanent Output
 - All of above
17. Which electronic component was made out of semiconductor material?
- Vacuum tubes
 - Transistors
 - ICs
 - All of above
18. Which of the following is valid statement?
- Data in itself is useless unless it is processed
 - The data that is processed is called a program
 - The data which is not yet processed is information
 - Information is processed by computer to generate data.
19. The Second Generation Computer was based on _____.
- Vacuum Tube
 - Silicon Chips
 - Transistor
 - Bio Chips
20. Personnel who design, program, operates and maintains computer equipment refers to
- Console-operator
 - Programmer
 - Peopleware
 - System Analyst
21. A system is
- an integration of different units so as to achieve an objective
 - input unit
 - input and output unit
 - input, output and storage units

- The translator program used in assembly language is called
- Compiler
 - Interpreter
 - Assembler
 - Translator
23. Regarding data, computers are very good at
- store
 - Processing
 - retrieve
 - All of above
24. First generation computers used _____ for memory
- vacuum tubes
 - silicon chips
 - magnetic drum
 - RAM
25. Web cam is an
- input unit device
 - output unit device
 - processing device
 - Input and Output device
26. Bit stands for
- Binary digits
 - bit of system
 - a part of byte
 - All of above
27. Which of the following is a read only memory storage device?
- Floppy Disk
 - CD-ROM
 - Hard Disk
 - None of these
28. Primary memory stores
- Data alone
 - Programs alone
 - Results alone
 - All of these
29. After copying the content how many times can you paste?
- 1
 - 16
 - 32
 - Many
30. WAN stands for
- Wap Area Network
 - Wide Area Network
 - Wide Array Net
 - Wireless Area Network
31. An error in computer data is called
- Chip
 - Bug
 - CPU
 - Storage device
32. The instructions for starting the computer are house on
- Random access memory
 - CD-ROM
 - Read only memory chip
 - All of above
33. Perforated paper used as input or output media is known as
- paper tapes
 - magnetic tape
 - punched papers tape
 - card punch
34. A Compiler is _____
- a combination of computer hardware
 - a program which translates from one high-level language to another
 - a program which translates from one high-level to a machine level language
 - None of these
35. Which unit holds data temporarily?
- Input unit
 - Secondary storage unit
 - Output Unit
 - Primary Memory Unit

36. The computer size was very large in
- A. First Generation
 - B. Second Generation
 - C. Third Generation
 - D. Fourth Generation
37. A name or number used to identify storage location devices?
- A. A byte
 - B. A record
 - C. An address
 - D. All of above
38. Which of the following is not computer language?
- A. High level language
 - B. Medium level language
 - C. Low level language
 - D. All of the above
39. The term 'computer' is derived from
- A. Greek language
 - B. Sanskrit language
 - C. Latin language
 - D. German language
40. Which of the following programming language were used in first generation computers?
- A. Machine language
 - B. Assembly language
 - C. Both of above
 - D. None of above
